

City Hall Update & Sneak Peek

In 2016, Council determined that given the condition of the 53 year old City Hall building, a major renovation was required.

As we draw close to completing the project, we want to give you a sneak peak inside...

WE ARE CLOSE!

The project remains on budget!

The updated plumbing, electrical and mechanical systems will provide for the efficient operation of the building.

The building's updated mechanical room

The excavated lower level provides on site file and archive storage.

On site file and records storage

Accessibility was a major focus for this project. City Hall will be accessible to everyone!

On site contractors finishing the accessible elevator installation

Fully accessible washroom

Accessible help desk counter

An energy efficient and healthy building!

The space has been insulated and the single pane windows replaced with thermal and UV protected and insulated windows.

Interior mold and asbestos has all been removed.

The lights are energy efficient with activation sensors.

We look forward to serving you at City Hall!
