

NOTICE OF STUDY COMPLETION

City of Owen Sound Goodyear Sanitary Pump Station Class Environmental Assessment

The City of Owen Sound has completed a Municipal Class Environmental Assessment (Class EA) study for the upgrade or replacement of the Goodyear Sanitary Pump Station (located on the corner of 32nd St E. and East Bayshore Road/Grey Rd. 15, Owen Sound). This Study focused on reviewing alternatives to remediate the problems with the existing Goodyear Sanitary Pump Station.

The alternative solutions being considered include: 1) Do Nothing; 2) Refurbish/Upgrade the existing pump station; 3) Construct a new pump station at the same location; and 4) Construct a new pump station at an alternative location.

Based on the evaluation of each alternative solution, Alternative 4, was selected as the preferred solution. Alternative 4 is for the construction of a new sanitary pump station at a location adjacent to the existing East Bayshore Road SPS, to replace both the existing East Bayshore Road SPS and Goodyear SPS.

The purpose of this notice is to inform the public that the Phase 2 report will be available on the Town's web page (www.owensound.ca). A hard copy of the Phase 2 report is also available to be viewed at City Hall currently at 945 3rd Avenue East, Unit 223, Owen Sound.

If concerns arise regarding this project that cannot be resolved in discussion with the City, a person or party may request that the Minister of the Environment and Climate Change make an order for the project to comply with Part II of the Environmental Assessment Act, which addresses the individual environmental assessment. Requests are to be submitted to the Minister, and copied to the City and WSP Canada Inc., before the end of the review period. If there are no requests received by March 17, 2017, the project may proceed based on the preferred solution.
