# 32<sup>nd</sup> Street East Watermain Replacement

## Construction Information:

The City has contracted Bridge Excavating, as the General Contractor, to oversee and complete the replacement of the Watermain on 32<sup>nd</sup> Street East and a section of 9<sup>th</sup> Avenue East. This work will involve the replacement of antiquated infrastructure while also improving the City's watermain resilience by establishing a new looping area. This work will also support the new development in the area. There are no planned road closures for this project.

## Potential Impacts:

### Property

The project is planned to stay entirely within the City's road allowance; however, some work may be required on private property for service connections. During construction, if you are in the area, you may experience some shaking and noise.

### Utility Interruptions

There will be planned water interruptions for select businesses. Notices will be delivered in advance prior to any planned outages.
